

COMPANY OVERVIEW

Halogen Capital is Malaysia's first licensed digital asset fund manager, founded in **2023**. Holding a **Capital Markets Services (CMS) licence** from the **Securities Commission Malaysia (SC)** and support from **Financial Markets Ombudsman Service (FMOS)**, Halogen provides institutional and retail investors with regulated access to digital assets through a traditional unit trust fund structure; making it the safest pathway to crypto in Malaysia and the **world's first Shariah-compliant cryptocurrency fund**. Current products include spot stablecoin funds, diversified crypto funds, fixed income funds, and private mandates for tailored investment options. As of November 2025, Halogen has grown its **AUM to approximately RM400 million**, serving thousands of investors across high-net-worth individuals, family offices, corporates, and institutions through a network of **15+ distributors** including commercial banks and FIMM-approved distributors. To date, Halogen Capital's investors are Kenanga Investment Bank, 500 Global, Digital Currency Group, The Hive, Jelawang Capital, and Mythos Venture Partners.

MARKET OPPORTUNITY

- **Global Crypto Asset Management:** Projected to reach \$4.68B by 2030 at a 23% CAGR, driven by institutional adoption and regulatory clarity
- **Islamic Finance + Crypto:** Projected to reach \$9.7T by 2030; Being the world's first Shariah-compliant crypto funds provides a direct gateway to this global capital pool
- **Institutional Adoption:** Based on a PwC report, 47% of traditional hedge funds reported digital asset exposure in 2024, up from 29% in 2023
- **RWA Tokenisation:** BNM's Digital Asset Innovation Hub, launched in June 2025, targets to narrow the RM101B SME financing gap via tokenised bonds, sukuk, and private credit

INVESTMENT THESIS

- **Regulatory moat:** Currently the only SC-licensed digital asset fund manager in Malaysia; creating a multi-year barrier to entry for new competitors
- **World's first Shariah-compliant crypto funds:** Unique positioning taps a global Islamic investor base estimated at 1.9 billion people
- **Strong founding team:** Experienced in fintech and startups; Indirect founders of RinggitPlus (1M monthly users, \$17.6M ARR)
- **RWA tokenisation roadmap:** This strategy expands TAM beyond crypto into tokenised bonds, sukuk, and real estate; which aligns with BNM's national digitalisation roadmap

COMPETITOR ANALYSIS

- **Local Digital Asset Exchanges (DAX):** SC-registered local DAX such as Luno, MX Global, and Tokenize provide self-directed trading but offer no professional fund management, portfolio construction, or Shariah certification. Halogen occupies this adjacent and complementary layer that these platforms cannot legally provide.
- **Digital Asset Fund Managers:** Direct competitor Cross Light Capital provides Performa Digital Asset Fund (PDAF), an actively managed fund that invests in a mix of Bitcoin, Ether, and global blockchain-related stocks. However, Halogen's edge derives from its full Shariah-compliance; leveraging on a different market share.
- **Future RWA token market:** Startups such as Frac and Kapital DX act more as Initial Exchange Offering (IEO) platform that helps institutions raise funds, compared to Halogen who builds and manages funds.

LEADERSHIP TEAM

Liew Ooi Hann

Founder & CEO

- Founder of Jirnexu (RinggitPlus); Experience at Barclays Capital
- CFA and CFP holder; BSc in Mathematics and Statistics at LSE

Lucas Ooi Ki Siong

Founder & CBO

KEY MILESTONES & ROADMAP

- CMS Licence granted by SC *Jul 2023*
- Halogen Shariah Bitcoin Fund launched *Aug 2023*
- Halogen Shariah Ethereum Fund launched *Jan 2024*
- 5 new funds launched *Jan 2024 - Sep 2025*
- RM13.3M seed round; led by Kenanga *Dec 2025*
- RWA tokenisation platform *Next*
- New digital asset funds *Next*

▼ Key Diligence Focus

Crypto market performance significantly impacts the AUM, fee revenue and future outlook of the company.

EXIT STRATEGY

Acquisition: Kenanga Investment Bank, a leading investor, represents a natural acquirer seeking to vertically integrate Halogen Capital into its broader capital markets platform. Additionally, regional banks and asset managers (CIMB, Maybank AM, RHB) expanding into digital assets are equally motivated acquirers; acquiring the SC licence, AUM, and Shariah-compliant product IP in a single transaction.
