

COMPANY OVERVIEW

SkyRealm is a Malaysian deep-tech startup, founded in **2022**, developing an **on-demand drone delivery platform (SkyDrop)** and a **Unmanned Traffic Management (UTM) SaaS solution** targeting the country's fast-growing e-commerce and food delivery markets. By integrating with existing delivery platforms such as GrabFood and Foodpanda under a **B2B2C model**, SkyRealm dramatically reduces customer acquisition costs and leverages existing order volumes. Early commercial validation is evidenced by secured Letters of Intent from F&B partners including **Mixue Malaysia** with 700+ stores nationwide. In Q4 2025, Authorisation to Fly (ATF) approval from Civil Aviation Authority Malaysia (CAAM) allowed them to run flight test programs and validate their proprietary UTM solution; crucial data required for their upcoming Special UAS Project (SUP) submission.

MARKET OPPORTUNITY

- **Malaysia e-Commerce:** Projected to double in current market size to **US\$23.9B** by 2030
- **Malaysia Food Delivery:** GrabFood and Foodpanda order volumes provide immediate demand pool, with a **13.5% CAGR** yearly
- **Drone Delivery:** Proven business model in USA (eg. Zipline and Wing); first-mover advantage in Malaysia
- **UTM SaaS:** CAAM mandating all drone operators to register & obtain flight approval via a UTM system from Q4 2025 onwards, indicating structural regulatory tailwind

INVESTMENT THESIS

- **First-mover advantage** in Malaysian drone delivery with CAAM regulatory positioning as a durable moat
- **B2B2C model** eliminates customer acquisition cost; plugs into existing platform demand
- **Revenue stream** through per-delivery fees (SkyDrop) and SaaS subscription model (UTM)
- **Early LOIs** from Mixue Malaysia (700+ stores) de-risk initial commercial traction
- **Credible team** with cross-sector depth in aviation, software & business

COMPETITOR ANALYSIS

- **Drone Delivery:** Local competitors like Aerodyne and Meraque Services target heavy-lift, cross-border, agricultural and industrial segments, while Capital A's experimental tech in food drone delivery remains in pilot phase since 2021 due to cross-border logistics priority. Hence, SkyRealm is positioned to capture an underserved urban food drone delivery market.
- **UTM SaaS:** Unlike multi-sector competitors Terra UTM, LOOKA UTMS, and Aim Aerial UTMS which serve surveillance, and large-scale agriculture, SkyRealm's UTM is purpose-built for high-frequency urban logistics, occupying a differentiated niche.

LEADERSHIP TEAM

Max Ting <i>Co-Founder & CEO</i> 17 yrs in software engineering, product development & product management; formerly at Thales and Panasonic.
Danny Chong <i>Co-Founder & CMO</i> 20+ yrs in sales, marketing and supply chain management roles; strategic partnerships
Assoc. Prof. Ir. Dr. Parvathy Rajendran <i>Technical Advisor</i> CAAM-certified drone pilot with 30+ global consultancy projects; anchors regulatory credibility. PhD and CEng certified

KEY MILESTONES & ROADMAP

● Exhibition at LAEC25 Wuhu, China	<i>Q3 2025</i>
● LOIs from F&B Partners	<i>Q4 2025</i>
● ATF approval from CAAM	<i>Q4 2025</i>
● CAAM SUP Approval	<i>Q4 2026</i>
● SkyDrop Platform Launch	<i>Q1 2027</i>
● Series A Round	<i>Q2 2028</i>
● UTM SaaS Launch	<i>Q4 2028</i>

▼ Key Diligence Focus

Pre-revenue & tight runway (15 months). Due diligence should centre on the team's ability to hit key milestones especially the **CAAM SUP Approval**.

EXIT SCENARIOS

Congeneric Acquisition

Grab, Foodpanda, and Pos Malaysia represent highly motivated strategic buyers. An acquisition offers them immediate, regulatory-compliant digital infrastructure to operationalize their smart logistics and regional drone delivery ambitions.

Horizontal Acquisition

International players like Zipline and Wing are potential acquirers seeking a regulatory foothold in Southeast Asia. Furthermore, Aerodyne represents a highly logical domestic acquirer to accelerate its expansion from surveying and inspection into the logistics vertical.
